## Fairfield company earns job creation tax credit

Staff Report

1:25 PM Wednesday, December 7, 2011

FAIRFIELD — MHC Medical Products received a six-year credit valued at 40 percent for its new location at 8695 Seward Road from The Ohio Tax Credit Authority, according to Ohio Department of Development spokeswoman Bethany McCorkle.

The credit is projected to create 25 jobs and \$900,000 in payroll, she said.

As part of the tax credit agreement, the authority requires the company to maintain operations at the Fairfield location for at least nine years, McCorkle said.

Founded in 2005, MHC manufactures diabetic testing products, blood pressure monitors and items geared toward other areas of health care for pharmacy wholesalers and their customers.
